

Document Index Duplicated (Formerly Unique Key Violation).

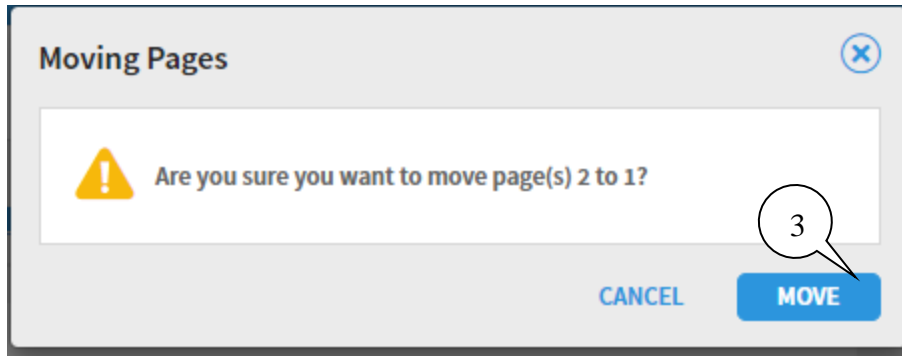

When indexing a scanned or imported document without doing an initial search for any existing document, a “**Document Index is Duplicated.**” warning may display if a document with the same index values exists. BDMS does allow the new documents to be added to the existing document.

1. Click **Append**.

2. Appending the new document will add it to the end of the existing document. Drag the new page(s) the page one of the existing document.

3. Choose MOVE to save your changes.
